1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on August 3, 2004 has been entered.

2. The following is an examiner's statement of reasons for allowance: the art of record does not teach or fairly suggest the invention as claimed. The art of record shows that there is a reason to sense the leakage of materials including ruthenium used in a vapor deposition apparatus and teach that there are sensors known for measuring the concentration of ruthenium. These references do not teach or suggest a detector as claimed. The previously applied references teach a detector as claimed, but do not teach or suggest its use outside of the vapor deposition reactor or as a leak detector. Thus there is not sufficient motivation to make a combination. Additionally the references submitted with the filing of the RCE have previously been considered and made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
